CONTINUING MEDICAL EDUCATION

Introduction

This year the Belgian Society of Digestive Endoscopy has chosen two hot topics for her annual symposium.

Enteral feeding has gained much interest in recent years but probably is still underused. This meeting however may alter things.

At present the medical and surgical treatment of obesity is a matter of great debate. A mixed panel of gastro-enterologists, internists and surgeons will be the guarantee for a vivid discussion.

Welcome in Essene

Dr Pieter van der Spek
for the BSDE

Accreditation has been requested.

08.30 Registration
