Introduction

This year the Symposium of the Belgian Society of Digestive Endoscopy will focus on the theme: "good clinical practice in endoscopy".

The morning session will address various important topics related to safe endoscopy: infection prevention and prevention of complications related to sedation, preparation for colonoscopy, and use of anticoagulant drugs.

The afternoon will start with a session on the adequate use of upper and lower endoscopy. Finally, the prevalence and treatment of procedural complications will be discussed.

Welcome in Leuven,
On behalf of the BVES-SBED,

Prof. Dr. Martin Hiele Prof. Dr. Ingrid Demedts

Accreditation has been requested.
